

Cleaning and Maintaining your Luxury Vinyl Floor

Ornato Luxury Vinyl Floors come with a highly resistant polyurethane wear layer. Following these cleaning and maintenance guidelines will ensure optimal results and increase the longevity of your floor.

Prevention

- Prevent dirt, grit and sand from getting inside your building as much as possible by using dirt-trapping walk-in/walk-off mats at all entrances.
- Where possible the mats should be of a size that is large enough to ensure that both feet come into contact prior to entering. These mats should be cleaned regularly.
- Do not use rubber or latex back mats or rugs and ensure they are colourfast. Rubber can permanently stain vinyl floorcoverings. Avoid using rubber backed mats, rubber furniture feet or rubber wheeled castors.
- Sliding or dragging furniture or other objects across the floor can scratch your floor. Use load bearing castors to prevent indentation from heavy furniture or appliances
- Use floor protector pads on the feet of all furniture.
- DO NOT use washing up liquid or any cleaning agent that contains bleach

General Care

In the beginning after Installation, thoroughly sweep or vacuum to remove any surface dust and dirt. Lightly mop and remove any excess water.

Daily Regular Maintenance

- Clean the floor surface regularly by sweeping or vacuuming to remove all surface dirt and other loose particles. This will prevent the surface from being scratched.
- Thoroughly clean and mop with water using recommended cleaning solution.
- Spot clean any marks or spillages immediately with recommended cleaning products and remove any excess water
- Keep the floor surface from pollutants and remove immediately. Do not use thinners or acetone for this purpose.
- All hard floors can be slippery when wet. Take extra care when cleaning and ensure the floor area is allowed to dry completely before use. During periods of wet weather, it may be necessary to put down extra matting to prevent water from being brought in from outside.
- Allow the floor to dry
- Avoid using aerosol sprays or silicone-based products, as these can make the floor slippery.
- Take care when using vacuum cleaners, as some may not be suitable for working with vinyl floors. Ensure there are no sharp edges or parts where grit can become embedded, as these may scratch the floor.

- If surface scratching does appear, it is important to locate and address the cause of the problem. The appearance of scratching can be improved by using Peerless jal lazer commercial floor polish stripper available from selected hardware stores
- Accidental damage can occur, by using Peerless jal commercial floor polish stripper available from selected hardware stores, may improve the look of the floor. Replacing a tile or plank also may be preferable.
